

Dr. Monty,

I just want to say THANK YOU for everything you are trying to do to help me save my children. I was blessed to have found you. I know my fight is not over, but I Thank You for staying right by my side until this is over.

Dr. Monty came onto this case in the middle of a nightmare. He has come to Colorado on NUMEROUS occasions to fight for my children. He has spent HOURS with my family not only here in Colorado, but on the phone and in court rooms. While I still have a long fight on my hands, I would not have gotten this far without Dr. Monty. He stood up in court and made statements about the courts and the situation that very few would have the guts to say. Without those statements many of the things the courts are doing would have never come to light. Without Dr. Monty, I would have given up long ago. Dr. Monty has never turned his back, washed his hands or walked away. Dr. Monty has continued to guide me through this nightmare and has been one of very few lights on a place of darkness for me and my family.

I know my fight is nowhere close to over, but I am hopeful. I know that Dr. Monty will be there to continue to fight. I have never met someone sooo dedicated to someone else's children. He gives up spending time with his own family to travel all over this country to help save our children. This world is a better place because of Dr. Monty. We should all be inspired by this man's heart, work and dedication to our children.

Thank you Dr. Monty and Thank You to your family for the sacrifices they make for ours.
